Bullets or Blades - Buy Select EVGA GeForce GTX Card, Choose Your Free Game

October 6th, 2015 - Whether you're fighting to free hostages or the depraved working class in London, the choice is yours. For a limited time, pick either Tom Clancy's Rainbow Six® Siege or Assassin's Creed® Syndicate free when you buy an EVGA GeForce GTX 980 or 970 graphics card.

Tom Clancy's Rainbow Six® Siege is an intense squad-based shooter that requires tactical coordination, precise action, and lethal force. Assassin's Creed® Syndicate extends the iconic series in the downtrodden times of the Industrial Revolution. How do you compete? Breach or fortify? Brutal force or extreme stealth?

Whatever your choices are, you can count on the elite performance of a GeForce GTX GPU and NVIDIA GameWorks™ technologies like HBAO+ and TXAA to dominate the game. GeForce Experience will allow you to tune your graphics and capture every glorious moment.

Experience the game you want—The Way It's Meant to be Played—with GeForce GTX.

*Valid only with the purchase of a qualifying EVGA product model listed below while supplies last and the product must be purchased from EVGA.com on or after October 6th, 2015.

About EVGA

EVGA is the #1 NVIDIA authorised partner in channel sales throughout North America and UK. Based on the philosophy of intelligent innovation, market knowledge, and the real time operation, EVGA continues to identify the need in the market place and providing the solution to that need. By offering product differentiation, 24/7 tech support, a 90 day Step-Up programme, and other customer focused programmes, EVGA is a clear leader in all categories: etail, retail, distribution, and system integration. With headquarters in Brea, CA, EVGA's global coverage includes EVGA GmbH in Munich, EVGA LATAM in Miami, and EVGA Hong Kong. For further information online about EVGA, visit: <http://eu.evga.com/>

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
