

Introducing the EVGA GeForce GTX 750 and GTX 750 Ti - The Next Generation in Power

- Tuesday, February 18, 2014 □

Step up to EVGA GeForce GTX gaming with the new GTX 750. Its powerful, ultra-efficient, next-gen architecture makes the GTX 750 the weapon of choice for serious gaming at an incredible value.

GTX 750 and GTX 750 Ti cards give you the gaming horsepower to take on today's most demanding titles in full 1080P HD. They deliver 25% more performance than previous-generation cards and up to twice the power efficiency, thanks, to the next generation NVIDIA Maxwell architecture. Plus, they come loaded with GeForce GTX gaming technologies like NVIDIA GameStream, G-Sync and GeForce Experience.

If you're looking for hyper-realistic gameplay, stunning visuals and exceptional value, this is your graphics card!

EVGA GeForce GTX 750 and GTX 750 Ti Features:

- +25 Watts on GTX 750 ACX / 750 Ti ACX – Bonus 6-pin power input connector provides an additional 25 watts, giving you an increase in power of 35%! This increase in power gives the card significantly improved overclocking headroom.
- NVIDIA G-SYNC Ready – The EVGA GeForce GTX 750 series have full support for NVIDIA G-SYNC Technology with included DisplayPort connector.
- Double Ball Bearing Design – The EVGA ACX Cooler features a double ball bearing design, meaning the fans have an average lifespan of 12 Years!
- Copper Core Insert included on EVGA Superclocked range of GTX 750 / 750 Ti – Lowers temperatures by 5 degrees Celsius.

Winner of the PC Pro Excellence Award 2013 in the Graphics Card category (September 2013).
Winner of the Custom PC & Bit-tech Award 2013 for Best NVIDIA Graphics Card Manufacturer (May 2013).

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
