EVGA Announces the 500B Power Supply

- Thursday, July 11, 2013
With price and performance in mind, the EVGA 500B is the best value power supply for your next build on a budget. With 80 Plus Bronze standard, over 80% efficiency under typical loads, the EVGA 500B is a great choice. Combining 500W of continuous power and Single +12V High AMP rail design, gain maximum power and efficiency while staying protected with a series of over volt/over current protections all bundled into one!

Key Features:
• Exceptional 3 Year Warranty and unparalleled EVGA Customer Support
• 80Plus Bronze Certified, with up to 85% efficiency under typical loads
• High Amperage Single-Rail Design for Maximum power and efficiency
• Over Power/Under Power/Over Voltage/Short Circuit protection built in
• Quiet and Intelligent Auto Fan for near-silent operation
• New 4th Gen CPU Certified Haswell Ready

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
