

EVGA offers €25 Cashback on EVGA GeForce GTX 960 (EUROPE ONLY)

- Thursday, July 16, 2015 □

EVGA is running a €25* Cashback program on EVGA GeForce GTX 960 in Europe, through July 2015.

Consumers can qualify for €25 Cashback when they purchase an EVGA GeForce GTX 960 graphics card from participating online retailers in Europe** from 6 July 2015 through to 2 August 2015. To be eligible, the end user is required to register their new graphics card and follow the steps of the Cashback claim process*** at eu.evga.com.

For further information and a current list of participating online retailers, please visit:

<http://eu.evga.com/articles/00945/EVGA-Cashback-on-EVGA-GeForce-GTX-960/>

More online retailers are being added so please keep checking EVGA's EU website for updates.

Graphics cards with EVGA's ACX 2.0+ cooler bring new features to our award winning ACX 2.0 cooling technology. A Memory MOSFET Cooling Plate (MMCP) reduces MOSFET temperatures by up to 11°C, and optimised Straight Heat Pipes (SHP) additionally reduce GPU temperature by 5°C. ACX 2.0+ coolers also feature optimised swept fan blades, double ball bearings and an extreme low power motor, delivering more air flow with less power, unlocking additional power for the GPU.

Features of ACX 2.0+:

- dBi (dB Noise Inverter) – EVGA's ACX 2.0+ fan turns off below 60C, generating 0dB of noise.
- MMCP (Memory MOSFET Cooling Plate) – Full size cooling plate makes direct contact with memory and MOSFETS, reducing memory temps by up to 9°C and MOSFET temps by up to 11°C.
- QSD (Quick Switch Dual BIOS) – Multiple integrated BIOSes allow you to switch to the secondary with the flick of a switch.
- OPT (Optimised Power Target) – The power target is precisely tuned for the perfect balance of thermal, power and performance, offering 33% more power over reference.
- SHP (Straight Heat Pipes) – Triple 8mm straight heat pipes offer 6% better heat dissipation than bent heat pipes with reduced thermal resistance.

Additional benefits for consumers purchasing an EVGA GeForce GTX 960 include:

FREE EVGA SOFTWARE

EVGA PrecisionX 16 – Built for DirectX 12 – This software allows you to fine tune your graphics card, including GPU Clock Offsets, Memory Clock Offsets, Fan Speed, Voltage, and much more. This latest version of PrecisionX has been revamped with a new GUI, new OSD (On-Screen Display) features, improved voltage and pixel clock control, integrated Steam Achievements, full support for Microsoft DirectX 12 API, and more. True enthusiasts know to go with the number one choice for GeForce overclocking: EVGA PrecisionX 16.

Find out more at: <http://eu.evga.com/precision/>

EVGA OC Scanner X – This application allows you to take your card to the limit with exclusive built-in artifact scanning, benchmark tools, GPU vitals information, CPU burn-in utility, and built-in log functionality. When combined with EVGA PrecisionX, your GeForce overclocking experience is complete!

EVGA 3 YEAR WARRANTY

EVGA provides a global warranty of 3 years on all GTX graphics cards that have a suffix of -KR in their product code (as well as for new regional part numbers, -K5 and -K6, for Germany and France respectively).

Learn more at: <http://eu.evga.com/support/warranty/>

EVGA EXTENDED WARRANTY – 5 YEAR OR 10 YEAR PROGRAMS

End users can also opt in to Extended Warranty for 5 year or 10 year programs. The cost for Extended Warranty starts from as little as 8 Euros.

Find out more, at: <http://eu.evga.com/support/warranty/extended.asp>

EVGA TRANSFERABLE WARRANTY

Don't forget that EVGA's warranty is transferable (as far as we know this is unique among graphics cards manufacturers). It means that if you wanted to sell on your graphics card after one year, for example at an online auction site, then the next owner would have a graphics card that still has two years of warranty on it. In our estimation this is pretty unbeatable.
