

EVGA Passes the 2GHz Barrier! New World Record with First True 2GHz on GTX 780 Ti**- Friday, July 4, 2014** □

Extreme overclockers, Vince "K|NGP|N" Lucido and Illya "Tin" Tsemenko have once again teamed up with the latest EVGA hardware to set new benchmark and frequency world records. Armed with an EVGA GeForce GTX 780 Ti Classified K|NGP|N Edition graphics card, an EVGA X79 Dark motherboard, and the latest and greatest EVGA Power Supplies, Vince was able to push the GPU clockspeed up to a staggering 2025MHz, a new world record. This frequency also allowed for a new 3DMark Fire Strike Extreme World Record, 8793 points.

These accomplishments once again prove EVGA's dedication to the enthusiast community, and why EVGA hardware is the #1 choice for gamers and extreme overclockers.

Winner of the PC Pro Excellence Award 2013 in the Graphics Card category (September 2013).

Winner of the Custom PC & Bit-tech Award 2013 for Best NVIDIA Graphics Card Manufacturer (May 2013).

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
