

Introducing the EVGA X99 Lineup

- Friday, August 29, 2014 □

The EVGA X99 lineup has arrived. EVGA has rebuilt its motherboard lineup for the next generation Intel® platform, offering a stunning set of new features and overclocking support. These motherboards also feature EVGA's new GUI BIOS that focuses on the best overclocking support, functionality, and are straight and to the point – the way a modern BIOS should be.

The Intel® X99 platform unlocks incredible performance:

- Supports up to 16 CPU threads (8-core)
- First desktop platform to support DDR4 memory
- Up to 40 PCI-E 3.0 lanes
- Native SATA 6.0Gb/s & USB 3.0
- Up to 20MB CPU Cache on 8 Core CPU

Intel® Core™ i7-5960X vs. Intel® Core™ i7 4960X

- Game Physics and AI up to 14% FASTER (3DMark Fire Strike Physics Extreme)
- 4K Video Editing up to 20% FASTER (Adobe Premiere Pro CC)
- 3D Rendering up to 32% FASTER (CINEBENCH 15 X)

EVGA will have three products available starting today: EVGA X99 Micro, EVGA X99 FTW, and the EVGA X99 Classified.

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
