

EVGA Announces the EVGA Z68 Motherboard Lineup!**- Friday, August 5, 2011** □

The EVGA Z68 motherboards have arrived! These motherboards based on the latest Intel Express Chipset offer incredible performance and overclocking with Intel Core i5 and Core i7 processors, and with the new Intel Smart Response Technology, users can combine a Solid State Drive with a traditional mechanical drive and receive both high performance and high storage capacity! Intel Smart Response Technology implements a storage I/O caching system to provide users with faster response times for frequently used applications.

The entire EVGA Z68 lineup has full support for SATA III/6G and USB 3.0 giving you the latest standards in high performance storage, and a forward thinking true next generation motherboard layout allows you to take control!

New and Key Features introduced on the EVGA Z68 Motherboards:

- * Supports Intel Core i5 and i7 Socket 1155 Processors
- * Intel Z68 Chipset
- * Supports up to 3-way SLI + PhysX
- * 4 DIMM Dual-Channel DDR3 2133Mhz+ (up to 16GB)
- * Supports Intel Smart Response Technology

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
