

Introducing the EVGA SuperNOVA P5 Power Supplies

- Thursday, September 23, 2021 □

Time To Buy Platinum

The EVGA SuperNOVA P5 joins the elite ranks of the EVGA 80 PLUS Platinum power supplies. These power supplies continue to push the envelope with the latest certifications and Intel® power-on standards. Replete with 80 PLUS Platinum-rated efficiency, a fully-modular cable design, 100% Japanese capacitors, and an ultra-quiet 135mm Fluid Dynamic bearing fan with EVGA ECO mode, these power supplies are built for performance and silence.

Platinum Rated Efficiency

80 PLUS Certification ensures your power supply isn't wasting power and turning it into excess heat. Under typical load, this power supply is 92% efficient or higher.

Active Clamp Design - Low Ripple and Noise

The P5 power supplies also feature an active clamp circuit design, DC-to-DC converter, and active PFC to provide tight voltage regulation and low ripple and noise.

Power Charts

Fully Modular Design

Use only the cables you need, reducing cable clutter and improving case airflow.

100% Japanese Capacitors

Get the most reliability and greatest performance with the use of the highest possible quality Japanese Capacitors.

100% Aluminum Solid State Capacitors on the Modular Board

Solid State Capacitors improve efficiency and reduce the impact of environmental factors after power is converted to DC, but before it leaves the power supply.

Ultra Quiet 135mm Fluid Dynamic Bearing Fan With EVGA ECO Mode

The P5 features a full-sized FDB fan in the chassis, which provides a longer life and quieter operation than traditional power supply fans. Enable EVGA ECO Mode to turn the P5 completely silent at low to medium loads.

Noise Charts

Made to Protect and Serve

The EVGA P5 Series also includes a full suite of protections (OCP, OVP, UVP, OPP, SCP, OTP) for safety and security, and are covered by EVGA's industry-leading 10 Year Warranty and Customer Support.

World leading EVGA warranty and support for 10 years

About EVGA

Founded in 1999, EVGA has grown exponentially in the channel, serving the system builder, distribution and retail markets with products that offer the highest in quality and customer satisfaction, thereby making the computing experience transparent to the hardware in the box. EVGA only offers visual processing products based on NVIDIA chipsets and in year 2005 expanded its product line to include motherboards.
